Cinematography Review:

The cinematography in 'Hijack' is a true highlight of the film. Shot in stunning 4K resolution and mastered in Dolby Vision, this high-definition stream brings the tense, high-stakes situation to life in stunning detail. The camera work is fast-paced and frenetic, capturing the chaos and panic on board the plane. Close-ups of the characters' faces convey the fear and desperation in their eyes, drawing the viewer into the heart of the action.

The use of cinematic techniques such as rapid cuts, close-ups, and wide shots creates a sense of tension and urgency, perfectly capturing the high-pressure environment of the hijacking. The cinematography also makes excellent use of the plane's interior, utilizing the cramped corridors and cramped seats to create a sense of claustrophobia and confinement.
